

1. Quiz (15 Questions – Mix of MCQ, True/False, Short Answer)

Part A: Multiple Choice

1. C
2. B
3. D
4. C
5. D

Part B: True/False

6. True
7. True
8. False
9. False
10. True

Part C: Short Answer

11. Object is an instance of a class
12. Class defines the attributes and methods while objects use the properties of attributes and methods in the class.
13. It uses to set up the initial state of an object
14. `Car c = new Car();`
15. Accessor and mutator

2. Code Examples

Challenge Task: Book Class (Student Practice-Fix the errors)

```
public class Book {
    String title;
    String author;
    int yearPublished;

    public Book(String t, String a, int y) {
        title = t;
        author = a;
        yearPublished = y;
    }
    public void displayBookInfo() {
        System.out.println("Title: " + title + ", Author: " + author + ", Year: " + yearPublished);
    }
    public boolean isClassic() {
        return yearPublished < 2000;
    }
    public static void main(String[] args) {
        Book b = new Book("To Kill a Mockingbird", "Harper Lee", 1960);
        b.displayBookInfo();
        System.out.println("Classic? " + b.isClassic());
    }
}
```

3. Student Worksheet

Section A – Fill in the Blanks

1. A _____ class _____ is a blueprint for creating objects.
2. An _____ object _____ is an instance of a class.
3. The _____ new _____ keyword is used to create objects.
4. A _____ constructor _____ has the same name as the class and no return type.
5. Use the *this* keyword to refer to the _____ current instance _____ object.

Section B – Write Code

```
class Movie {
    private String title;
    private String genre;
    private double rating;

    public Movie(){
        title = "";
        genre = "";
        rating = 0.0;
    }
    public Movie(String t, String g, double r){
        title = t;
        genre = g;
        rating = r;
    }

    public void printMovieInfo(){
        System.out.println("Title: " + title + "\nGenre: " + genre + "\nRating: " + rating);
    }
}

public class MovieTester {
    public static void main(String[] args) {
        Movie m = new Movie("Pirates of the Carribean", "Action", 9.5);
        m.printMovieInfo();
    }
}
```

Section C – Debug the Code

```
public class Car {  
    String model;  
    int year;  
  
    public Car(String m, int y) {  
        model = m;  
        year = y;  
    }  
    public void printInfo() {  
        System.out.println("Model: " + model + ", Year: " + year);  
    }  
    public static void main(String[] args) {  
        Car myCar = new Car("Honda", 2022);  
        myCar.printInfo();  
    }  
}
```

Section D – Reflection (Short Answer)

1. What was easy about today's coding tasks?

Because the answer are a bit direct and also a little repetitive

2. What was hard or confusing?

Mostly the question about finding and fixing error because sometimes there a small error that take a longer time to find one

3. Rate your confidence (1–10) with creating Java objects.

9 out of 10
