TECHNOPRENEURSHIP SEMINAR

SEMINAR TITLE:

DATE & TIME: 26 June 2024, 8:00 AM- 5:00 PM

LECTURER'S NAME: DR RAMESH K S @ MOHD ZAIDI BIN ABD

ROZAN

SECTION: 01

GROUP: 27

No	Name	Matric No
1.	MOHAMED ALIF FATHI BIN ABDUL LATIF	A23CS0112
2.	IMAN ABADI BIN MOHD NIZWAN	A23CS0084
3.	MUHAMMAD AFIQ DANIAL BIN ROZAIDIE	A23CS0117
4.	DHESHIEGHAN A/L SARAVANA MOORTHY	A23CS0072
5.	PRAVINRAJ A/L SIVABATHI	A23CS0171
6.	ESED NADI EYYUBIOGLU	A22EC4029

Intro:

SKUDAI, June 2025 — The Faculty of Computing Research and Innovation (FCRI) day emerged as a significant event, drawing industry professionals, technology enthusiasts, and curious minds to explore the fusion of Cloud Computing, Network Telecommunication, Human Resources exposure, and Artificial Intelligence. Hosted at N28A, Faculty of Computing, Universiti Teknologi Malaysia (UTM) on June 26, 2025, the seminar featured engaging sessions, exciting showcases, and a delightful array of food trucks. Participants had the opportunity to hear from professional speakers, explore booths showcasing the latest AI technologies, Network Telecommunication, Information and Communications Technologies (ICT), and also enjoy a variety of delicious treats.

FCRI event during June 26, 2025 in N28a Faculty of Computing

Objective:

The primary objectives of FCRI Day were to bring together industry professionals, tech enthusiasts, and students to explore the latest innovations in Cloud Computing, Network Telecommunication, Human Resources exposure, and Artificial Intelligence. Through professional talks and interactive exhibitions, participants gained valuable insights into the integration of these technologies, particularly how AI is shaping the future of ICT and network communication. The event served as a dynamic platform for learning, networking, and experiencing firsthand the real-world impact of advancing technologies.

Seminar Highlight:

One of the standout moments of the Technopreneurship Seminar was the dynamic panel discussion featuring renowned industry experts: Mr. Louis Chee, Head of Business Development at AI Nusantara; Mr. Wesley Chong Kwai Yong from BNext Solutions; Nur Arina Binti Ramlee of CyberSolution Technologies; and Dr. Lau Cher Han, representing LEAD. Held at Dewan Kejora, N28a, the discussion delved into emerging technologies such as stable diffusion, examining their transformative impact on content creation across industries. Each speaker brought a unique perspective on how artificial intelligence is reshaping creative workflows, generating original content, and pushing the boundaries of what's possible in digital storytelling. The session left the audience with deep insights into current tech trends and practical examples of how AI is being used to drive innovation, inspiring students to think creatively and embrace technological change in their future careers.

Adding to the vibrant energy of the event were the Exhibition Booths, which created an engaging and interactive atmosphere throughout the faculty building. Leading companies including Huawei, DF Automation & Robotics, Nexscholar, and other forward-thinking organizations showcased their latest technological advancements through hands-on, live demonstrations. These booths allowed students to explore cutting-edge developments in areas such as automation, cloud computing, and embedded systems, offering a real glimpse into the tools and platforms shaping the tech landscape. More than just tech demos, the booths functioned as valuable networking hubs, giving students the opportunity to connect with professionals, ask about career pathways, and even discover internship or collaboration opportunities. This industry showcase, while compact, delivered a strong message about the importance of bridging the gap between academic learning and industrial innovation, reinforcing how collaboration between universities and companies can help drive Malaysia's digital economy forward.

Automation and Embedded systems showcase

Showcase Highlight:

The event featured several showcases. **Nexscholar** demonstrated their research website, which allows students to search for the most suitable projects that match their needs using AI. **Lattel Robotics** showcased their robot, named **Jupyter Robot**, which is capable of autonomous navigation, visual perception, speech interaction, mobile manipulation, and utilizes AI, machine learning, and cloud computing. Both **TG Group (“TG”)**, a workforce solutions provider that adopts a future-centric approach, providing talent solutions for the digital world, and **Huawei**, a leading global provider of information and communications technology (ICT) infrastructure and smart devices, showcase job opportunities under their respective companies, offering various job positions, each highlighting different requirements and key responsibilities. This can be served as an insight for students about their desired job so that they can prepare themselves for it. **Cyberport Academy**, a business unit of **MSC Cyberport Sdn. Bhd.** is a certified training provider specializing in digital skills certification training in Malaysia committed to supporting the national agenda in Malaysia, assisting individuals and companies in adopting Industry 4.0 and embarking on the industrial revolution. **RunCloud** also has a training program named **RunCloud Education**, which specializes in cloud computing, web application deployment to the cloud, and understanding cloud services with digital certificates included.

The showcases gave participants a better understanding of how AI and digital technology are used in different industries. They learned about job opportunities, the skills needed for future careers, and available training programs. The event also shared useful information on the latest tech trends, funding options for AI projects, and how to prepare for the digital workforce.

Challenge:

Throughout our involvement in the Technopreneurship Seminar and Showcase, there were a number of obstacles which were encountered by our technical team that put our coordination and endurance to test. It was challenging to handle different tasks with strict time limitations, more so, when the duties overlapped, such as AV installation and booth assistance. Being a team player meant that we had to keep adjusting and working with one another especially when we experienced some unexpected problems. Interaction with other organizing teams proved to be a difficulty too, as sometimes unclear directions led to delays. Nonetheless, we were able to pull together to get over these challenges and make the event a success, and ran it smoothly. But after all, we were able to get past all these problems and help to succeed overall with the event.

Conclusion:

FCRI Day 2025 was a dynamic and successful event that facilitated cooperation among academia and industry and brought forth the best trends in Cloud Computing, Network Telecommunication, Human Resources development, and Artificial Intelligence. The event was held at the Faculty of Computing, UTM, and featured an integrated blend of professional know-how, technological exhibition, and career development. Attendees could engage on a one-to-one basis with experts, discover advanced AI applications such as autonomous robotics and smart recruitment tools, and familiarize themselves with upskilling programs relevant to Industry 4.0.

More than just a seminar, FCRI Day served as a bridge between students and real industry practices, allowing them to understand the needs of the digital workforce and prepare them for the evolving job market. The event successfully created a platform of knowledge-sharing for the participants to network, learn, and envision their future roles in spearheading technological innovation. As digital transformation continues to accelerate, such an event as FCRI Day is vital in cultivating future-capable talents and propelling Malaysia forward in the global technology landscape.

📺 Unforgettable Experience and Memories on the The Faculty of Computing Research and Innovation (FCRI) day that being held on 26 June 2025 at UTM Skudai, the event that hold under the name 'Technopreneurship Seminar 2025: Empowering Innovation Through Emerging Technologies' 🧑🏻

🌸 As part of the Technical Team for the seminar, my team and I were assigned to manage vehicle parking for students, lecturers, VIPs, and food truck vendors. Although I was initially nervous, I managed to guide everyone to their designated spots. Along the way, I encountered a mix of behaviors like some people were cooperative, while others responded less positively. Despite this, we handled the situation professionally, and everything went smoothly. In the end, all parties, including the VIPs and vendors, were satisfied with the parking arrangements, making the experience both rewarding and insightful.

🎤 Featuring speakers:

- ♦ Dr. Yeong Chee Fai (CEO, *DF Automation & Robotics*)
- ♦ Mr. Chan Weng Hun (Head of Cloud Core, *Huawei* GSRC Malaysia)
- ♦ Russell Marland (Senior Operations Director, *TG Human Resource Management Sdn Bhd*)

🌟 My Reflections 🌟

Attending the FCRI Day 2025 Technopreneurship Seminar was a valuable experience that expanded my understanding of current technological trends. The panel discussion featuring industry experts provided real-world insights into how technologies like stable diffusion are transforming content creation and digital industries. Exploring exhibition booths from companies such as Huawei, Nexscholar, and DF Automation & Robotics gave me exposure to practical innovations and future career opportunities, reinforcing the importance of staying updated with industry demands and technological advancements. Moving forward, I aim to sharpen my skills and apply it in internships and collaborative projects, helping me bridge the gap between academic knowledge and industry practices while preparing for a career in Malaysia's growing digital landscape. Lastly, I would like to give my thanks to Dr Mohd Zaidi Dr Sean and others to guide in making this memorable event this semester.
