INDIVIDUAL CRITICAL REFLECTION (STARR MODEL)

Purpose

The reflection encourages students to **critically analyse their learning experience**, transforming experience into meaningful learning, as emphasised in SULAM critical reflection practices

STARR Reflection Framework

Students must structure their reflection using **ALL five components of the STARR model**:

S – Situation

Describe the context of the activity.

- What was the experiential learning activity?
 - Where and when did it take place?
 - Who was involved?
-

T – Task

Explain your specific role.

- What were you required to do?
 - What responsibilities were assigned to you?
-

A – Action

Describe what you actually did.

- What actions did you take?
 - What decisions or strategies did you apply?
-

R – Result

Explain the outcomes.

- What were the results of your actions?
 - What went well and what did not?
 - What impact did the activity have on you or others?
-

R – Reflection

Critically reflect on the learning.

- What did you learn about yourself, the subject, or the community?
 - How does this experience relate to theory or course content?
 - What would you do differently in future similar activities?
-

Reflection Requirements

- Length: **800–1,000 words**
 - Must demonstrate **critical thinking**, not just description
 - Must clearly link **experience → learning → improvement**
 - Use **first-person writing** (e.g., *I learned that...*)
-

ACADEMIC INTEGRITY

- The reflection must be **original and personal**
 - Copying reflections from peers is strictly prohibited
 - Plagiarism will result in disciplinary action
-

DECLARATION

Each student must include the following declaration:

“I declare that this reflection is my own work and is based on my personal experiential learning.”

INDIVIDUAL REFLECTION USING STARR MODEL RUBRIC

Assessment Criteria & Weighting

STARR Component	Excellent (A)	Good (B)	Satisfactory (C)	Weak (D)	Marks	Student Marks
Situation	Context clearly described	Mostly clear	Basic description	Unclear	10	
Task	Role & responsibility clearly explained	Adequate explanation	Limited clarity	Vague or missing	10	
Action	Actions explained with justification	Actions described	Minimal explanation	Incomplete	20	
Result	Outcomes critically analysed	Outcomes explained	Outcomes stated only	Outcomes unclear	20	
Reflection (Critical Thinking)	Deep insight & self-awareness	Meaningful reflection	Surface reflection	No reflection	30	
Structure & Clarity	Logical, coherent & well written	Minor issues	Acceptable	Disorganised	10	
TOTAL					100
