1. Objectives

The objective of the Daily Activities Recorder App is:

- 1) To provide users a simple and easiest way to record, manage and organize their activities daily.
- 2) To help the user to keep track of tasks, schedules and categories of activities in a structured manner.
- 3) To improve time management and productivity of the users

2. Brief Description of the system

The Daily Activities Recorder App is a user-friendly mobile application that allows users to input and also store the daily activities as well as their respective time or category. The system enables users to add new activities, display the recorded activities and remove the activities once no longer needed.

3. Explanation of the Interface

a. Activity Input Field

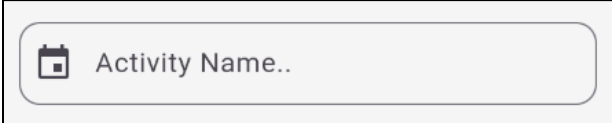

A screenshot of a mobile application interface showing a text input field. The field has a light gray background and a rounded rectangular border. On the left side of the field, there is a small calendar icon. To the right of the icon, the text "Activity Name.." is displayed in a dark gray font.

Figure 3.1 Activity Input Field Interface

This figure 3.1 shows the input field that allows users to enter the name of the activities like study, jogging, class and so on. It serves as the primary identifier for each activity in the list.

b. Time or Category Input Field

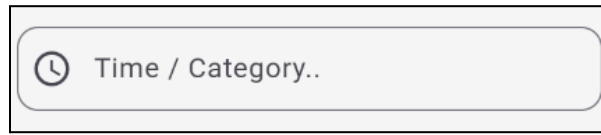

Figure 3.2 Time or Category Input Field Interface

This figure 3.2 shows the input field that enables users to input additional details about the activity, such as the time like “8:00 PM” or category like “Exercise”. It provides context and helps users better organize their activities.

c. Add Button

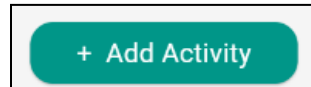

Figure 3.3 Add Button Interface

This figure 3.3 shows the “+ Add Activity” button is used to submit the entered information. When pressed, the system captures the activity name and time/category, then saves it to the activity list displayed below.

d. Activity List

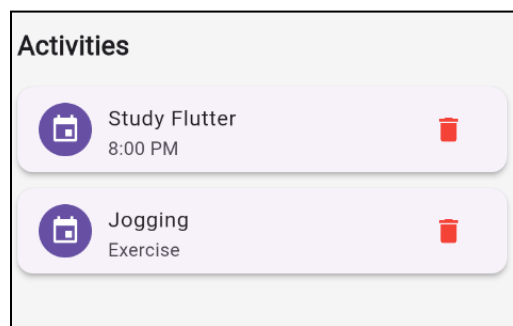

Figure 3.4 Activity List Interface

Figure 3.4 shows the activity list that displays all recorded activities in a structured format. Each item shows the activity name along with its corresponding time or category, allowing users to easily review their daily tasks.

e. Delete Button

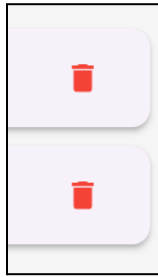

Figure 3.5 Delete Button Interface

Figure 3.5 shows that each activity item includes a delete icon. This button allows users to remove specific activities from the list. It helps users maintain an up-to-date and relevant set of activities by deleting completed or unnecessary entries.

4. Screenshot of the Application

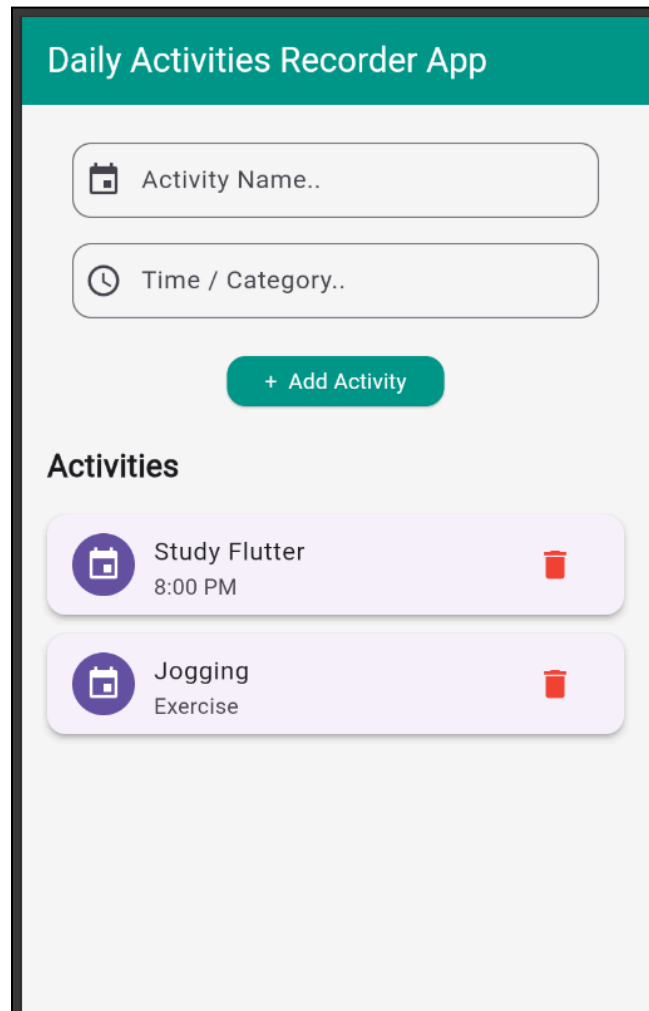

Figure 4.1 Daily Activities Recorded App Interface

5. Conclusion

In conclusion, the Daily Activities Recorder App provides a simple and effective solution for managing daily tasks and activities. With its user-friendly interface and essential features such as adding, viewing, and deleting activities, the system helps users stay organized and improve their time management. Overall, the application successfully meets its objective of offering a convenient and efficient activity tracking tool.
